How Odata Works :

BTP with oDATA:

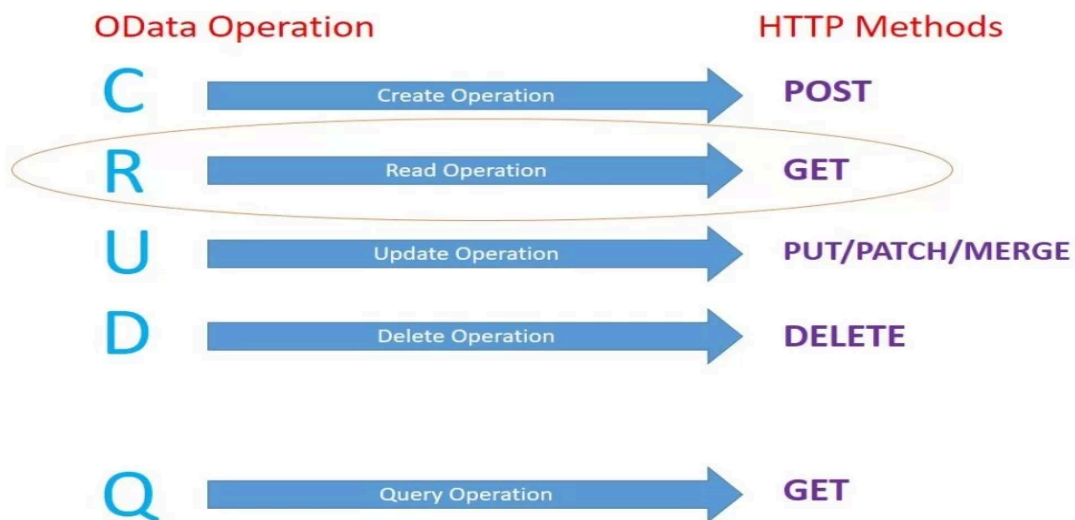

Odata Service Creation in SAP world :

1. Using SEGW Tcode
2. Using @Odata.publish :true Annoation in a CDS view (BOPF - CRUDE)
3. Restful ABAP (RAP) -> Latest

Different Odata Operation (Http Methods) :
Here Get method is used for both Read **(single record- Entity)and Query operation(Multiple records-Entity set)**

Odata URL FORMAT :
